

ógin

ÓGIN Nature, 41% 70cl

Discover the captivating emergence of plants during early spring and summer, meticulously captured, extracted, and bottled.

At the core of this process is the same foundational blend that defines all our gin varieties: the robust northern juniper, the invigorating essence of freshly gathered bog myrtle, the delicate allure of meadowsweet, the earthy notes of angelica, and the zesty infusion of currant and coriander leaves.

To enhance this harmonious base, an array of carefully chosen herbs is introduced in varying proportions. While the central essence remains steady, each vintage encapsulates a truly unique character, as nature's dance unfolds a new with every passing year.

Herbs and botanicals from this year's seasons.
